Date.....

# Connect the Dots to Discover Who's Here!

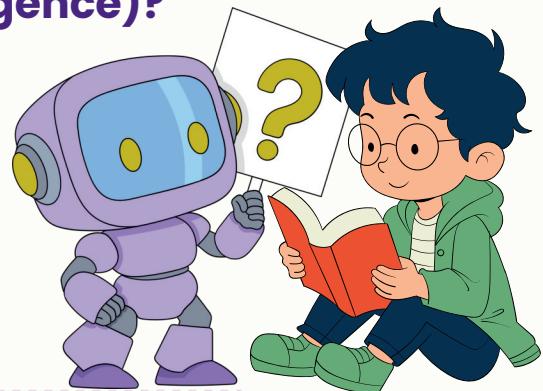

What do you think this is? -----

He listens, learns, and grows, just like you!

# SESSION 01 – What is AI?

## Have you heard of AI (Artificial Intelligence)?

Imagine you have a super-smart robot friend who can talk, think, draw, play games, and even help you do homework! That smartness is called AI. It's like the robot's brain made by people.

## AI vs. Non-AI. What's the Difference?

AI Machine (SMART)	Not AI Machine (NOT SMART)
AI is a special kind of machine that can learn new things and get better over time.	A Non-AI machine is a regular machine that only does what it's told.
It can listen, talk, and help you by understanding what you say or do.	It doesn't learn or change, it works the same way every time.
Examples: Siri, YouTube recommendations, ChatGPT.	Examples: fan, calculator, microwave, alarm clock.

**DID YOU KNOW?**

Some pets are robots!  
AI pets can recognize your face, hear your voice, and learn your habits, just like real animals!

# Worksheet

## 01) Tick the Smart Machine:

Date.....

# Worksheet

## 02) Match the following:

1

Alexa

A

Shows videos you like

2

Face Unlock

B

Drives safely without a driver

3

YouTube

C

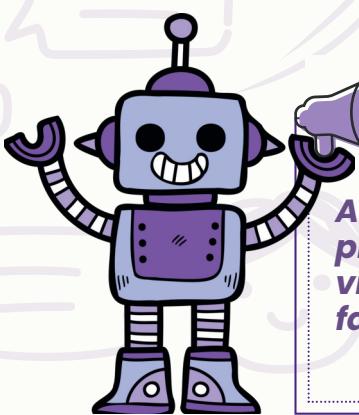

Listens and talks to you

4

Self-driving Car

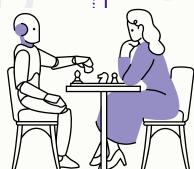

D

Opens your phone with your face

### DID YOU KNOW?

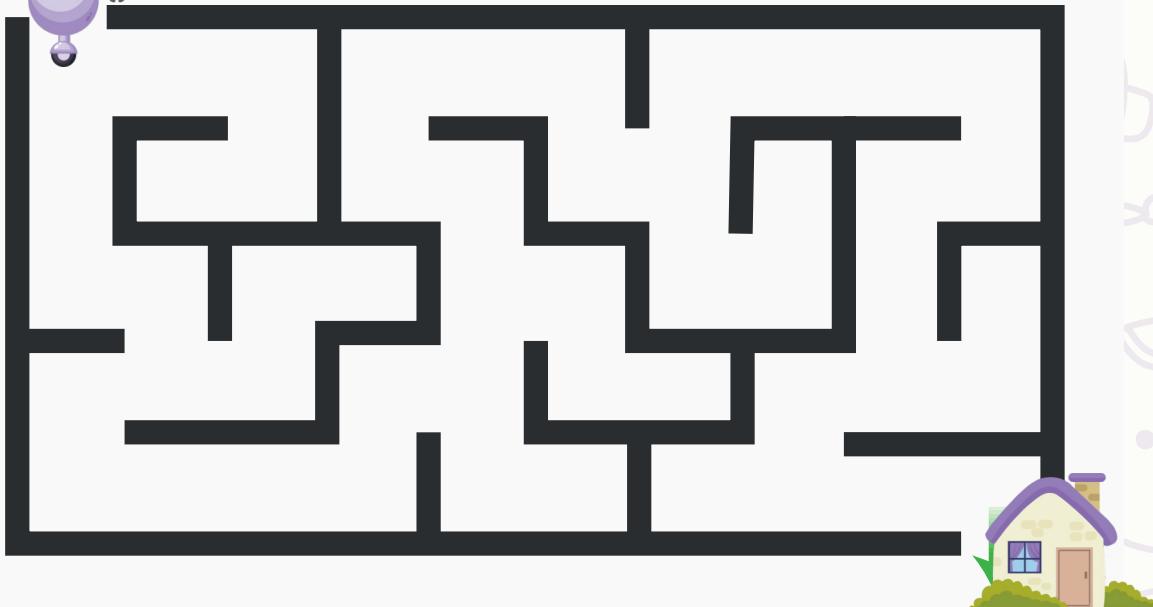

AI defeated the world's best players in chess, Go, and even video games because it learns faster than humans!

Date.....

# Worksheet

## 03) Help the AI robot:

## 04) Answer in 2-3 lines :

Which smart gadget do you use at home?  
How does it help you?
